

## HTML And CSS Project

**Task1:** Give the name of web page 'TechPro Education' and use the icon provided to show on the web tab.

### Task2:

- a) On the top of the page write the head of project 'HTML & CSS Office Hour Small Project' Tip: Use `<h1>`

**Style:** Change the color, and background of title using inline styling CSS

- b) Write the purpose of the project in two small paragraph : 'The first purpose of that small project is to refresh hour HTML and CSS knowledge.'

→ separate p1 and p2 using `<hr>` element...

'Second aim of that project to apply our HTML and CSS knowledge and do practice.'

Note: before Writing paragraph use `<h2>` tag to add heading of 'Heading and Paragraph in HTML'

**Style:** In first paragraph, Use `<b>`, `<em>`, `<u>` and in second paragraph use `<bdo>` tags with `dir='rtl'` attribute.

- c) Add Pdf Project description to the web page:

Note: use `<div>` tags to separate all other task from each other.

**Style:** Use different background-color for each `<div>` tag using inline CSS style.

**Task3:** Lets create one list with order and another list without order

`<h2>`Lists in HTML `</h2>`

First List: `<h3>` Ordered List `</h3>`

→ Apex is Easy but we need to do practice.

→ Prepare for Interview

→ Do practice on trailhead

→ Revise all class from time to time

**Style:** use Internal CSS to give different color and writing format to do list.

Second List: `<h3>` Unordered List `</h3>` :

Get some fruits, bread, Egg, Milk, Cookies

**Style:** use Internal CSS to give different color and writing format to do list.

Note: Now we have more than `<h2>` and `<h3>` use external CSS to give different color, writing format and background-color to the h2, and h3.

**Task4:** `<h2>` Iframes In HTML `</h2>` Create iframe to show another web page within our project web page.

**Style:** use inline CSS to specify the width and height of the iframe.

**Task5:** `<h2>` Tables in HTML `</h2>` Create following table in HTML

**Style:** use External CSS to give styling to the table

Courses	Hour/wk	Course Length	Start Date	Price
JavaScript	3	1 Month	1-Apr	500\$
Apex	5	3 Month	5-Apr	2000\$
HTML & CSS	3	2 Week	1-May	300\$
Salesforce	5	3 Month	5-Apr	2000\$

**Task6:** `<h2>` Links in HTML `</h2>` give a link after a table to get more information about HTML table.

**Style:** use id attribute for link heading to give different styling from other `<h2>`

Note: Use class attribute for each `<div>` tag to give different styling. Use external CSS to give different background

**Task7:** <h2> Forms in HTML</h2> Create following form in HTML. Form should have two part one for personnel Information another one for Additional Information.

Personnel Information: First Name, Last Name, Date of Birth, Gender, (All this should be required)

Additional Information: Education, Interest Courses, Country of Apply, Upload File, Additional Info:

Add two buttons: Submit button and Refresh Button.

**Style:** Use external CSS to give different background color and borders to the first part and second part of form.

**Task8:** Use YouTube videos in project webpage

**Style:** use inline CSS to give height and width of video
